Professional Summary
Detail-oriented Data Analyst with 3 years of experience transforming complex commercial data into actionable strategic insights. Expertise in SQL database querying, predictive modeling in Python, and executive dashboard development in Tableau and Power BI.

Technical Skills
SQL, Python, Excel, Pandas, NumPy, Power BI, Tableau, Data Visualization, Statistics, ETL, Data Cleaning, Data Modeling, A/B Testing, Business Intelligence

Work Experience
Data Analyst - Retail Insights Corp (2022 - Present)
- Formulated SQL queries across multi-million row relational databases to quantify customer retention rates, increasing LTV by 14%.
- Designed automated Power BI and Tableau KPI dashboards utilized daily by C-suite executives for operational decisions.
- Conducted hypothesis testing and A/B testing on pricing models, resulting in an annualized $340,000 revenue lift.

Junior Data Analyst - FinMetrics (2021 - 2022)
- Built automated ETL data cleaning pipelines using Python and Pandas, saving 15 hours of manual data preparation weekly.
- Produced statistical reports analyzing churn correlation using regression and hypothesis testing.

Key Projects
Customer Lifetime Value Predictive Engine
Technologies: Python, SQL, Pandas, NumPy, Statistics, Scikit-learn
- Analyzed 500,000 transactional records to segment customer churn cohorts.
- Delivered interactive visualization dashboards communicating risk factors to commercial managers.

E-Commerce Conversion Analysis Dashboard
Technologies: Power BI, SQL, Excel, Data Modeling
- Centralized fragmented marketing analytics from Google Analytics and internal databases into a single BI model.

Education
Bachelor of Science in Statistics and Data Science
University of Washington, Seattle (2017 - 2021)
